-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 8-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant recites the term "could be" to describe the limitations in the invention. This is an ambiguous and indefinite term.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3-12,14 are rejected under 35 U.S.C. 102(b) as being anticipated by Cummings et al (6,039,461).
3. Cummings discloses a frame which has a container (102) with a reflection layer (214) in a inner surface; a light source module (220) which is placed inside the container; a (208) diffuser which is placed upon said light source module, at least one

Art Unit: 2875

elastic device placed inside said container (240), which has one end fixed on a bottom of said container and the other end supporting said diffuser (fig 2); said elastic device is reflection material (all materials unless otherwise mentioned are reflective); the elastic device is a spring; the elastic device is elastic piece, the elastic device is a plastic piece (being briefly deformable, a spring is considered to be plastic); the container has a fixing base (242) on the bottom the elastic device places inside the fixing base whose surface has a reflection layer (fig 2); the container further comprises a cavity on the bottom, the elastic device being placed inside the cavity; the elastic device keeps a space with the diffuser

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over

Cummings et al.

6. Cummings discloses the claimed invention except for the recitation of the elastic device being transparent. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the spring of Cummings transparent since such a modification would be purposeful to prevent viewing of the spring from the outside of the containing device

Allowable Subject Matter

7. Claims 13,15,16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
